Accounting Information Systems

Call for papers

INTERNATIONAL SYMPOSIUM ON ACCOUNTING INFORMATION SYSTEMS (ISAIS) 2021

June 13, 2021 - Marrakech, Morocco

<http://AISconference.org>

Call for papers

Tilburg University, together with Hasselt University, is pleased to announce the tenth **International Symposium on Accounting Information Systems (ISAIS)**, immediately preceding ECIS 2021, the European Conference on Information Systems. ISAIS rotates annually between the University of Melbourne (Australia), Tilburg University (The Netherlands) and Michigan State University (USA) to be hosted every 3 years in the US, Europe, and Asia-Pacific.

The objective of ISAIS is to bring together researchers from all disciplines related to Accounting Information Systems (AIS). Topics of interest include, but are not limited to topics on the intersection of accounting and: AIS development, internal control developments, strategic information systems, cultural influences on AIS, business intelligence, decision aids, business process management, audit and assurance regarding AIS, continuous auditing and reporting, enterprise resource planning, knowledge management, XBRL, process mining, data-analytics, distributed ledgers, RPA ...

Various recent technologies pose challenges and represent opportunities that have the potential to completely disrupt the whole spectrum of phenomena that AIS is interested in. While the AIS research field is identified by its cross-discipline character, **we specifically (re-)articulate the ambition of reaching out to neighboring communities including information systems research, business process management and systems engineering**. Having ISAIS as a pre-ECIS workshop is a clear signal towards this ambition. In this way, we aim to further broaden the expertise and scope of discussions beyond the circle of accounting (information systems) researchers who are traditionally strongest represented at ISAIS.

The **2021 ISAIS program** will tentatively include an overview of AIS research – what have been the topics of interest since 2000? – followed by a panel discussion. Further, the program will consist of journal quality paper presentations and a tutorial. The tutorial will be on Process Mining, an example topic of interest for researchers from different fields who can find a common interest in the AIS community. The tutorial will be given by Prof. Jan Mendling of WU Vienna.

The emphasis of ISAIS is on interaction, discussion and debate in a friendly, supportive and relaxed atmosphere. At the same time, the intent of ISAIS is to provide a global forum for bringing the leading AIS researchers and developing scholars together to discuss and critique leading edge research in the field.

Submission instructions

There are two types of submissions: regular submissions for completed research papers of journal paper quality and research forum submissions for work-in-progress. We particularly encourage doctoral students and junior researchers to also submit their research. If completed then the paper will be eligible for a regular submission, else the paper can be submitted to the research forum.

All papers are to be submitted via EasyChair: <https://easychair.org/conferences/?conf=isais2021>. Please make sure to provide anonymous manuscripts (no author names on the pdf).

Selected papers, at the author's prerogative, will be considered for publication in revised form in the International Journal of Accounting Information Systems (IJ AIS).

Review process

The review process will include two reviews per paper. One review will be provided by an accounting research PC member and one by an information systems PC member.

Key dates

Submission deadline: March 15, 2021

Notification of decision: May 1, 2021

ISAIS 2021: June 13, 2021

Organisation

General chair

Eddy Vaassen, Tilburg University, The Netherlands

Program Committee Chair

Mieke Jans, Hasselt University, Belgium & Maastricht University, The Netherlands

Program Committee - EXTENDED

Edward W. N. Bernroider, Vienna University of Economics and Business (WU), Austria

Michael Davern, University of Melbourne, Australia

Benoît Depaire, Hasselt University, Belgium

Dennis Fehrenbacher, Monash University, Australia

Severin Grabski, Michigan State University, United States

Peter Green, Queensland University of Technology, Australia

Tyge-F. Kummer, Queensland University of Technology, Australia

Stewart Leech, University of Melbourne, Australia

Angela Liew, The University of Auckland, New Zealand
Jan Mendling, Vienna University of Economics and Business (WU), Austria
Uday Murthy, University of South Florida, United States
Hajo Reijers, Utrecht University, The Netherlands
Nilesh Saraf, Beedie SFU, Canada
Eddy Vaassen, Tilburg University, The Netherlands
Miklos Vasarhelyi, Rutgers, The State University of New Jersey, United States
Hans Weigand, Tilburg University, The Netherlands
Martin Weisner, The University of Melbourne, Australia
